

## **Student Teacher Program**

One of the benefits of my studio is the Student Teacher Program. This is an opportunity for parents, students and high school age students to receive quality instruction at a lowered cost while still participating in the group lessons, events and recitals in my studio.

Here's how it works:

- Students who are in their first, second or third year of piano may choose to work with a Student Teacher
- Student Teachers are advanced high school students who are currently studying piano with me and have shown a dedication to piano music and the educational process
- Student Teachers work closely with me in order to provide a quality experience for the students they are instructing
- I hold monthly meetings with all Student Teachers to check up on how things are going and provide pedagogical instruction
- All students who study with a Student Teacher will automatically be given the option to join my studio at the end of the school year, or continue study with their current Student Teacher, or another Student Teacher when needed (as in the case of a graduating senior).

It's a great program and a wonderful opportunity for students, parents and Student Teachers!

Please see the Student Teacher Studio Policy for more detailed information, or contact me if you have questions!
